Profile Summary

- Motivated Computer Software Engineering graduate student with strong knowledge in IT infrastructure, networking, artificial intelligence, and cloud technologies.
- Skilled in Windows Server, Linux, Active Directory, Python, SQL, AWS, Microsoft Azure, and system troubleshooting.
- Strong understanding of machine learning, deep learning, image processing, and cybersecurity concepts.
- Experienced in developing AI/ML-based academic projects and configuring virtualized infrastructure environments.
- Quick learner with excellent problem-solving, communication, and collaboration abilities.
- Passionate about infrastructure engineering, cloud computing, automation, and enterprise technology solutions.

Experience

• Technical Support Assistant | Academic IT Projects

- Assisted users in troubleshooting hardware, software, and network-related technical issues.
- Installed and configured Windows and Linux operating systems in virtual lab environments.
- Worked with networking concepts including TCP/IP, DNS, DHCP, VPN, and firewall configurations.
- Managed VMware virtual machines for infrastructure testing and deployment projects.

Projects

• Uncovering the Truth: Image Forgery Detection | Python, CNN, Machine Learning, Streamlit

- Developed an AI-based image forgery detection system using Convolutional Neural Networks (CNNs) and machine learning algorithms.
- Implemented image preprocessing, feature extraction, ELA analysis, and classification techniques.
- Used SVM and Random Forest algorithms to improve forgery detection accuracy.
- Built an interactive Streamlit interface for image uploads and analysis.

• IT Infrastructure Monitoring System | Python, VMware, Windows Server

- Developed a monitoring system to track server uptime, CPU usage, memory utilization, and disk performance.
- Automated alert notifications and centralized monitoring dashboards.

- **Cloud-Based Virtual Lab Environment | AWS, Azure, VMware**

- Built and managed virtual machines using VMware, Microsoft Azure, and AWS cloud platforms.
- Configured Windows and Linux servers for testing and remote administration.

Skills

- **Infrastructure & Systems:** Windows Server, Linux, Active Directory, VMware
- **Networking:** TCP/IP, DNS, DHCP, VPN, Firewall Configuration
- **AI & Machine Learning:** CNN, Machine Learning, Deep Learning, Image Processing
- **Cloud Technologies:** AWS, Microsoft Azure, Cloud Infrastructure
- **Programming:** Python, SQL, HTML, CSS, JavaScript

Education

- **Concordia University Wisconsin**
Master of Science in Computer Software Engineering
- **Malla Reddy University**
Bachelor of Technology in Artificial Intelligence and Machine Learning

Certifications

- AWS Cloud Practitioner (Learning)
- Microsoft Azure Fundamentals
- Cisco Networking Fundamentals
- Google IT Support Fundamentals
